Professional Profile

Dynamic and results-driven Software Engineer with extensive experience in developing modern full-stack web applications utilizing JavaScript, React, Next.js, Node.js, and Express. Proven ability to create responsive user interfaces and scalable backend systems, integrating APIs effectively to optimize application performance. Adept at leveraging cutting-edge technologies to build clean, user-focused products, with a strong commitment to continuous improvement and professional development through real-world projects. Recognized for delivering high-quality solutions that enhance user experience and drive business growth.

Core Competencies & Technical Skills

- Full-Stack Development: React, Next.js, Node.js, Express, Python
- Frontend Technologies: JavaScript, TypeScript, Tailwind CSS, Material UI, CSS, HTML5
- Backend Development: REST API Development, MongoDB, PostgreSQL, Firebase
- Performance Optimization: Client-Side and Backend Performance, Caching Strategies
- UI/UX Design: Responsive Web Design, User-Centered Design Thinking, Accessibility-Aware UI Design
- DevOps & Automation: CI/CD, Git, Docker, Serverless Architecture
- AI and Automation: Multi-Provider AI Systems, AI Integration Architecture
- Project Management: Agile Methodologies, Cross-Functional Collaboration

Professional Experience

Fullstack Engineer (Contract)

Easy Technologies

November 2023 - January 2024

- Developed a full-stack technical machinery cataloging platform, enhancing equipment discovery and client inquiries.
- Built a responsive React (TypeScript) SPA using Vite and Tailwind CSS, implementing route-based code-splitting and state management with Zustand.

- Engineered a serverless Express REST API deployed on Vercel, optimizing MongoDB connections with Mongoose ODM.
- Integrated Firebase Admin SDK for secure authentication and Nodemailer for automated email routing, significantly improving user experience and load performance.

Frontend Developer (Contract)

Meerge Africa

January 2024 - January 2025

- Spearheaded the development of a restaurant management SaaS platform, creating a merchant admin dashboard and mobile-responsive customer ordering web application.
- Utilized Next.js and React for frontend development, enhancing dashboard load speeds by 20-40% through optimized SQL aggregations.
- Integrated Supabase for SSR authentication and PostgreSQL for database management, reducing database queries by 30-50% with in-memory caching.

Frontend Developer (Contract)

Confidential Client (NDA Protected)

February 2025 - May 2025

- Enhanced frontend experiences for multiple WordPress-based websites by implementing modern UI interactions and animations, improving user engagement across devices.

Full Stack Software Engineer

Confidential Software Company (NDA Protected)

May 2025 - May 2026

- Contributed to the development of internal and client-facing software applications, utilizing a diverse technology stack including React, Next.js, and Python.
- Developed scalable web applications and APIs while collaborating on UI improvements and backend services, ensuring rapid feature delivery in fast-paced environments.

Key Projects & Technical Achievements

CareerBot AI Job Automation Platform

- Developed a local-first career automation ecosystem with Next.js and Node.js, automating resume tailoring and cover letter generation.
- Implemented a multi-model LLM integration for job application lifecycle management, ensuring data privacy through a custom atomic JSON persistence layer.

Portfolio Platform

- Engineered a production-ready portfolio platform combining Next.js and Express, delivering a responsive user experience and reliable contact automation.

EduAI - Full-Stack AI Learning Platform

- Built an AI-powered education platform integrating syllabus ingestion, semantic tutoring, and classroom collaboration on a scalable architecture.
- Developed features such as AI tutoring chat, voice learning, and real-time classroom workflows, emphasizing maintainability and extensibility.

Hawk Mart Storefront & API

- Created a standalone Next.js storefront with a focus on UX design and performance, implementing a secure Express API for product management and payment processing.

Education

Software Engineer Certification

ALX Africa

- Certified Software Engineer with expertise in backend development, software engineering principles, and basic frontend development.

Introduction to Cybersecurity

Cisco Academy

- Completed an introductory course covering foundational concepts in cybersecurity, including vulnerability analysis and threat detection.

Certifications & Professional Development
